PSC Awareness Week Launches October 23!

PSC Partners Seeking a Cure invites you to join us in designating October 23-29, 2016 as PSC Awareness Week! Patients, caregivers, medical institutions, researchers, public health officials, healthcare professionals, and businesses alike can all JOIN US IN THE FIGHT!

Our goals for PSC Awareness Week include:

- Raising awareness of primary sclerosing cholangitis within the general public
- Creating an international collaboration of PSC stakeholders to bring attention to PSC
- Increasing public understanding of how PSC affects patients and families
- Encouraging PSC patients to share their stories
- Creating a media "buzz"
- Using #PSCaware on social media

You can play a part in PSC Awareness Week 2016 by educating yourself and those around you about PSC.

We encourage everyone in the international PSC community to join in this shared effort.
