Transition of Care: Planning for Children with a Rare Disease

Global Genes, a nonprofit organization working to eliminate the challenges of rare disease, will hold a live webinar on November 22, 2016 at 10:00 AM PST to address the challenges of transitioning a child with a rare disease into adult care. As parents of pediatric PSC patients, we think this topic may hold some interest to you. For more information about the webinar and to register, click here.

"As caregivers age, preparing for your loved one's future can be daunting. It may be difficult for both you and the loved one in your care as you both transition into new roles and new chapters in your life. How do you plan for care for your adult child living with a rare disease-both physically and financially. This webinar will discuss topics such as housing, financial planning, social support, and emotional obstacles to help you manage these life changes. If you are unable to attend the live webinar, still register so you can receive a link to the recorded content."
